

SIMPro

from Wireless Logic & GPI

Manage your SIM estates simply

Activate

Monitor

Control

Reports

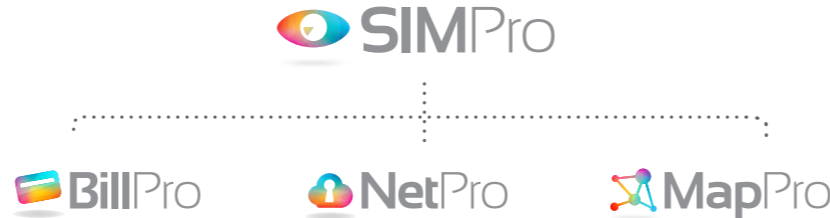

Billing

One platform for visibility and control for ALL networks and countries

SIMPro is Wireless Logic's online provisioning platform-as-a-service (PaaS) which empowers users to manage entire multi-network SIM estates from one simple to use and intuitive window.

SIMPro, now in its fourth upgrade is more intuitive, user-friendly, and tailored to the needs of Wireless Logic's customer base.

Billing, view and report

Enhanced search and filter tools
- *segment your SIMs more effectively*

- **BillPro** Billing within SIMPro: View and download invoicing - instantaneous month-end figures for effective financial control
- Drill down to analyse billed usage - bit by bit, SIM by SIM - detailed reporting whether for 1 or 100,000 SIMs
- Download comprehensive SIM reports - more visibility, better analysis of performance
- View and download current month usage reports - available in a number of downloadable formats.

Access Value Added Services

- SMS aggregation tool - simple to use multiple network SMS sending - two-way messaging, individual, group, or multi group actions, set up AT commands to modem
- **MapPro** Mapping services with HERE, a Nokia business - link to the new HERE platform for exclusive mapping/GIS solutions
- **NetPro** Real-time usage visibility and usage alerts - available with NetPro - instantaneous data activity reporting plus integrated alerts on a SIM by SIM basis
- Aggregation management - view realtime aggregated data across 'same tariff/same network SIM pools' (available for SIMs using NetPro).

NEW SIMPro at a glance

Manage your entire SIM estate - across ALL mobile network Operators (MNOs), by SIM, groups of SIMs or entire bases - all controlled across SIMPro's brand new 'customer dashboard'.

- Activate, bar, refresh, progress report and SIM swap
- Works across our growing number of MNOs and satellite bearer services
- Manage and change services (e.g. roaming enabled)
- 'Customer Solutions' - Utilise tailored tariffs identified and matched to specific applications
- Manage billing
- Plus new added value services.

SIMPro DASHBOARD

Integrate with your own systems - new APIs - personalise SIMPro fields to match your own operations

- Add your own data/identifiers to your SIMs via Custom Fields - make your SIM estate entirely recognisable to your operation
- Track requests by adding your own reference - easier progressing of all your actions
- Create Data Synchronisation & Request Management via API - full integration with your current systems.

Customer Solutions

Tailor tariffs and set profiles that include information relevant to your application

Activation profiles - individually designed packages which feature solutions for one or more SIM uses. works with you to create the perfect profile(s) - no more detailed explanation of the intended use - simply click on the profile created for the intended application.

- Identity of the application
- Approved tariff for specified application for the SIM
- Information re data usage set and overage costs
- Cost information re additional services e.g. SMS, CSD, Voice
- Specified services for the application e.g. CSD Data and Fax Numbers, Voice, Voice Mail, SIM PIN number and more
- Profile of expected connectivity - e.g. Public APN, NetPro APN (Wireless Logic's Private VPN) or your own existing Private APN
- Specific user information for utilising NetPro e.g. Fixed Public IP, Fixed Private IP, IPSEC VPN, SSL VPN.
